Castle of Doubt

Is there no way out of here ?
Asked the king with fright
There are enemies all over
I don't know what's wrong or right

Droughts and floods and fires
The queen was on her knees
We are wasting this kingdom
This warming has to cease

No reason to get excited
The sceptic slyly spoke
It's just a full-scale experiment
So we'll see if it's a joke

Evolution or creation
be that as it may
but the life on earth is sacred
exclaimed a man in grey

We have all the solutions
did the advisor sadly state
but no one pays their contribution
and soon it is too late

Outside in the darkness
the rain began to pound
a child was seeking refuge
and the ground was drowned

Far between sundown's finish an' midnight's broken toll
We ducked inside the doorway, as thunder went crashing
As majestic chimes of bolts struck shadows in the sounds
Seeming to be the chimes of climate tolling
Tolling for the forests, that fires turn to ash
For all the homes and houses, the gusts of hurricanes thrash
and all the mighty ices, that into oceans crash
An' we gazed upon the chimes of climate flashing

Through the city's melted furnace, unexpectedly we watched
With faces hidden as the walls were tightening
As the echo of the wedding chimes before the blowin' rain
Dissolved into the chimes of the lightning
Tolling for farmers, whose soil is turned to dust
For the ecosystems crashing, when balance's being bust
Tolling for the species, not able to adjust, An' we ...chimes of climate flashing

Through the mad mystic hammering of the wild ripping hail
The sky cracked its portent in naked wonder
That the clinking of the church chimes blew far into the breeze
Leaving only chimes of lightning and its thunder
Striking for the scientists, whose warnings are unheard
For the many able engineers, whose solutions are deterred
and for the climate sceptics, whose reasoning is absurd, An' we ...chimes of climate

In the wild cathedral evening the rain unraveled tales
For the disrobed faceless forms of no position
Tolling for the tongues with no place to bring their thoughts
All down in taken-for-granted situations
Striking for the nations, where land is lost to sea
Striking for the refugees, with nowhere left to flee
and each and every searching soul, without a place to be, An' we ...chimes of climat

Even though a cloud's white curtain in a far-off corner flared
An' the hypnotic splattered mist was slowly lifting
Electric light still struck like arrows, fired but for the ones
Condemned to drift or else be kept from drifting
Tolling for the young and bold, not knowing what goes on
For our children's children's children, not yet knowing we did wrong
for the billions babies of posterity, to which this earth belongs, An' we ...chimes

Paralyzed an' dumbstruck as I recall when we were caught
Trapped by no track of hours for they hung suspended
As we listened one last time an' we watched with one last look
Spellbound an' swallowed 'til the tolling ended
Striking for the gentle, striking for the kind
Striking for the guardians and protectors of our time
An' the heroes of the climate, who never will resign, An' we ...chimes of climate

Climate hero

I dream of them drowning, I'm hearing them cry

Children in panic, they don't want to die

The water is shallow, but to them it is high

If you want to be a hero, you'll have to get wet

If you want to be a hero, you'll get your feet wet

Grown-ups are watching, close by the sea

Somebody help them ! Go out and see !

But nobody's thinking that somebody's me

If you want to be a hero, you'll have to get wet

If you want to be a hero, you'll get your feet wet

The temperatures rising, degree by degree

We're free to waste the future to be

But a freedom like that, is prison to me

% A climate hero is something to be %

It's twenty years now, they tried to agree

The reason for failure is easy to see

Nobody wants the costs that will be

% A climate hero is something to be %

Everyone knows it's a matter of price

As long as it's zero, emissions will rise

It's not all that hard, but nobody tries

Damage done

I saw the kilns for making cement

I saw the blast furnaces where coal is spent

Oh, oh, is this development?

I saw the power plant with chimneys high

I saw the smoke against the morning sky

Why, why, tell me why?

I saw the cars waiting to be filled

I saw the green meadows in the hills

Who'll stop the climate change, who will?

I sing the song because I love the land

there's some of you who don't understand

Oh, oh, it's getting out of hand

I see our future and the damage done

a little part of it in everyone

Oh, oh, it's just begun

But there are other ways of doing things

It's up to us what tomorrow brings

Oh, oh, the damage done

But when I think that we could do right

tears of rage do blind my sight

Oh, oh, the damage done

The Day of Grace

A day will come, when everything's undone
and man will rise in pride and glory
there'll be dancing in the street, to celebrate this feat
on the day when the dragon's down

And a rain will fall, unto the thirsty ground
and the fires of the forests will be fading
and ices cease to melt, and everyone can tell
a new world is a-waking

And the sun will rise in grace, and bring joy to every face
and the colours of the corals will be sparkling
and the species that are saved, will rejoice in dens and caves
the day when the warming stops

And the former climate foes, will be staring at their toes
and the birds and the bees will be laughing
and a meter on the wall, shows how CO₂ does fall
and the whole wide world is watching

Listen to the wind softly singing
words of a world that has agreed
and the bells of hope start their ringing
and we celebrate the future to be

It's a hard rain's a-gonna fall

Oh, where have you been, my blue-eyed son?

Oh, where have you been, my darling young one?

I've stumbled on the side of twelve melting ices

I've walked and I've crawled on eight arid acres

I've stepped in the middle of seven sad forests,

I've walked in the mud of the flood in the valley

I've been breathing the dust of the dry desert farmland

And it's a hard, and it's a hard, it's a hard, and it's a
hard, And it's a hard rain's a-gonna fall.

Oh, what did you see, my blue-eyed son?

Oh, what did you see, my darling young one?

I've seen coral reefs that were losing their colours

I've seen the homes of the children all flooded with water

I've seen the barren trees of an orchard all wasted

I've seen the future of man in the hands of big children

And it's a hard,

And what did you hear, my blue-eyed son?

And what did you hear, my darling young one?

I heard the sound of a thunder, it roared out a warning

Heard songs of birds that will cease to be singing

Heard the roar of an ice that could drown a whole nation

Heard a man denying that something is happening

Heard scientists speaking, and nobody listening

Heard one skeptic laugh, I heard many people crying

And it's a hard,

Oh, what'll you do now, my blue-eyed son?

Oh, what'll you do now, my darling young one?

I'm a-goin' back out 'fore the rain starts a-falling

I'll walk to the depths of the dry dusty deserts,

Where the people are many and their hands are all empty,

Where the sky is empty, and the sun has no mercy

Where the faces of the guilty are always well hidden,

Where hunger is ugly, where souls are forgotten,

Where black is the color, where none is the number,

And I'll tell it and think it and speak it and breathe it,

And reflect it from the mountain so all souls can see it,

Then I'll stand on the ocean until I start sinking

But I'll know my song well before I start singing

and everybody just goes on, as if it wasn't true
It's just a market failure, to be removed

It comes from our efforts to improve
To build an economy that grows
But the market is at loose, devouring oil and coal
like a monster machine beyond control
We need a price on carbon, to set the market right
They say it is impossible, but that's the biggest lie
It's just a market failure, to be undone

But it will meet the ones who are not swayed
and it will meet the ones who finds a way
It will meet with defiance, with persistence and with strength
It will meet with reason at length
It will meet with our mercy with the weak and the poor
It will meet with our duty, to the billions to be born
It's just a market failure, to overcome

Stand up, stand up, stand up against the greed
for our children, for life to come, for a world in need
Stand up, stand up, stand up, stand up.

Poor old nature, poor creation
I think you've been cast by a curse

But I don't want you to die, I can see all the lies

But it isn't too late to get hold our fate
and you know what I say is true

And meanwhile in mansions and manors with style
they are praising the progress and growth
and the leaders we need, are indeed paralyzed
and carping there's no other road

Poor old forests, poor old farmlands
as climate change will get worse
Poor old waters, poor old world
I think you've been cast by a curse

But you know that it's true, there is so much to do
it's no good to lie down and cry
and the day that you see, that's the day that all of your
sadness and sickness will die

For the wealth we are building, while wasting this earth
is only causing us pain
it's disguised itself well, as progress and growth
but destruction is still it's name

Let every straw and seed, let all that fields can give
Let all the fish and fowl, let all that makes us live
Let every little bird and bee, hear my solemn praise
Let all the life on land and sea be shielded by our grace

A hundred years ago this world was ruled by wilful kings
now freedom and peace is what democracy does bring
The world has wavered weary under world war one and two
and then through a cold war we shivered scared anew

But now we have a different threat, a warming war to wage
we can no more deny, we're in the greenhouse age
This time we have to face a more elusive enemy
whose appearance is the impotence of our society

This war is fought against all those who doesn't want to see
who are opposing all we need to do and all that needs to be
The heroes of our time do not lie slain on battle ground
They fight by finding facts and then spreading them around/

Mark Lynas has got a gruesome story to tell
Degree by degree unveiling our descent to hell
although it may seem hopeless, a struggle with no cease
remember the fight for democracy and peace

Stop the warming (+capo 3)

Am
We need to stop the warming
D
We need to stop the warming
F
We need to stop the warming now

C Am7
It seems you've lost our love,
Em G
It seems you lost our care.
C Am
It's you we're living on
Em G
but we're poisoning your air.

C
We need this planet
Am
it's the only one we'll have had.
Fm
We love this planet
G
Why must we treat you bad.

C Am
Why do we hurt you so,
Em G
We must have lost our minds.
C Am
We know what we should do
Em G
We're not the hurting kind.

C
You know we love you
Am
Why don't we take alarm.
Fm
Yes we love you
G
and go on doing you harm. Oooh.

Am
We need to stop the warming
D
We need to stop the warming
Fm
With an earth like you,
G C
there's nothing else we can do.

C Am
You know its up to us,
Em G
Our love is little worth
C Am
if we don't stop this fast,
Em G
destruction of the Earth.

C
Because we love you
Am
It is time for making up
Fm
for our trespasses
G
This climate change must stop.
Oooh.

No warming.
F C6
No warming, now.

Tell Me Why

Fossil fuel flames, burning future G A
fumes from the dragon of doom Em7 G D (G D)
drying farmland, burning forests G A
all seems to late or too soon Em7 G D

Tell me why A Em7 G D

Tell me why A Em7 G D

Is it right to pollute the air for free
and wrong to have a carbon tax, to hold off what will be

Dmaj7 G

Greenhouse gases, global warming
Why are we blind as can be
Ecosystems, brought to breakdown
Death comes degree by degree

Tell me why

Tell me why

Do we fail to agree on what to do

When the thing that we need is just a tax on CO2

Tell me we can cope, that there is hope
that we'll see the writing on the wall
Tell me nature's safe, there will come days
rising emissions will fall

Tell me why

Tell me why

Is it right to pollute the air for free
and wrong to have a carbon tax, to hold off what will be

While you see it your way G C G
We'll be hit by changes in the climate 'fore too long G C F G
We can work it out, we can work it out C G C D

(cHORUS)

repeat 1st verse (end on G)

We owe it (I Will Survive)

Our leaders act, as if they care Am7 Dm7
But I get so fed up with climate talks not leading anywhere G7 Cmaj7
and they hide behind each other, with no results to show Fmaj7 Hm7
because no-one is prepared to do what we need to do E_{sus}4 E7

We need to act, we need to care
and make an end to releasing greenhouse gases in the air
cause we owe it to the ones we love, to the grace that makes us live
to laughter and music, to all that life can give

Cause our future, is worth the fight
our destiny's not given and we can make it right
and we owe it to our brains, that we were given to use
and we owe it to our self-respect, to our freedom to choose

It's not really hard, to make it stop
With a price on CO₂ the emissions will drop
where are the leaders we need, responsible and strong
who have the courage and stamina, who dare to right the wrong

It can be done, it cannot wait
we need to end this global warming before it is too late
cause we owe it to this planet, to the life it's giving birth
cause we owe it to the billions, to be born upon this earth

We Were Given

We were given the grace, to see with our eyes
a world full of beauty, the wonder of life

We were given the flowers, the birds and the bees
the fields and the forests, the leaves on the trees

Stop the warming, stop the warming, o-oh stop the warming

We were given the earth, the crops and the seed
We were given the farmlands, that yield what we need

We were given the living, in oceans, on land
The future of earth, it's all in our hands

Save our planet, save our planet, o-oh save our planet,

We were given the choice, to care for or waste
to save or destroy. The world's at our grace

Why don't we take action, Why don't we start
to tax the emissions, it's not all that hard

Price the carbon, price the carbon, o-oh price the carbon
Price the carbon, price the carbon, o-oh price the carbon

While Glaciers Weep

I look at you now, see your temperature rising
while mighty glaciers weep

I look at you now, see your oceans a-rising
while nations 'r' lost in the deep

I don't now why, nobody told you
they stole and fooled you
I don't know how, someone controlled you
they bought and sold you

I look at you earth, and I notice you're turning
while drying rain forests sigh
It's just a mistake, but too late to be learning
while bleaching coral reefs die

I don't now how, you were diverted
you were perverted too
I don't know how, you were exerted
no-one alerted you

I look at you now, see the love there that's sleeping
while roaring hurricanes cry
I look at your life, that we fail to be keeping
while fertile farmlands turn dry

Who changed the climate

Not me, said the executive
of the power (plant) company
We have followed all the regulations
The competition was tough
and we're no charity
There should have been taxes and
legislations

Oh no, it wasn't me
said the president
both my hands were tied, and you know it
No I don't feel that good
when I realize what it meant
But with no support, I just couldn't do it

You say I let you down
you know it's not like that
I had to fight for my place and position
You say I'm responsible
but that's not where it's at
Without the votes, I'd been in opposition

Not me, the voter said
who elected the government
You know I was only one of many voices
I'm not the one who's bad
I'm really innocent
Can't you see, there were really no better
choices

You got a lot of nerve
to say I am to blame
Don't you know, I just couldn't help it
I tried to live my life
with no regrets or shame
Don't you see, someone should have
stopped it

The climate sceptic said
I just wanted a fair debate
When I was wrong, why just didn't you
show it
If I'd been silent
we would still have been too late
It wouldn't have changed a thing, and you
know it

Do you tell me we're helpless
and cannot make things shift
Tell me who's supposed to make things
happen
Do you say we're on a ship
helplessly adrift
With neither steering wheel, nor crew nor
captain

You Don't Care

You say we must go slow that we must wait, that we must protect progress and growth,
from any change Am G Dm C

A sensible man, with a balanced view, see it all go by, and you don't care Am G Dm

You don't care, if we melt the ice and oceans rise, you don't want to pay the price, F C
you don't care, you just don't care Cm7 F

If farmlands dry, if species die, if forest fires multiply, Dm C
you don't care, you just don't care Cm7 F

It's always something else and somewhere else, for everything we need to do, some
other time

You mobilize against a carbon price, while the emissions rise, but you don't care,
It's not hard to make polluters pay, to make emissions go away,
it's not hard, but you don't care

It's a race against the clock, and you know emissions can be stopped,
it's not hard, but you don't care,

you don't care, you don't care, you don't care, you just don't care, (4x)

Am G Dm C6(Am7)

There's always some excuse or reason why, to let it all go by, and justify, not to try
But your ways won't last, you'll soon be passed, and you will learn, the tide has turned
cause we care and we will stop this climate rape, this carbon dioxide,
this terracide, before too late

With the future of this earth at stake, for the billions to be born, we will do, what it takes

cause we care, we do care, we do care, we all do care

cause we care and we will stop this climate rape, this crazy carbon race,
before too late, we just can't wait
