

Castle of Doubt

Is there no way out of here ?
Asked the king with fright
There are enemies all over
I don't know what's wrong or right

Droughts and floods and fires
The queen was on her knees
We are wasting this kingdom
This warming has to cease

No reason to get excited
The sceptic slyly spoke
It's just a full-scale experiment
So we'll see if it's a joke

Evolution or creation
be that as it may
but the life on earth is sacred
exclaimed a man in grey

We have all the solutions
did the advisor sadly state
but no one pays their contribution
and soon it is too late

Outside in the darkness
the rain began to pound
a child was seeking refuge
and the ground was drowned
