

# Forwards

Happiness was all to short, and the past is lost and gone  
and you live with bygone joys .

The dark and cold does poison your mind  
and you find no way to rejoice

When your days are a rat race, and life's just a fight  
and the loser's always you  
It's easy to get stuck with yourself and the past  
but life is here and now and what you do

Let's use our heads, let's *go* ahead, go forwards, face the *future* Am Bm  
and forget, forget about the past G Bm Em  
Some rainy, lousy *Monday* morning, we'll find a door to open, Am Bm Em  
and a way ahead at last Am C D\*

The Arctic is melting, the sea levels rise  
and the wild-fires spread all around  
The climate news goes from bad to worse  
you can feel the shit going down

The climate agreement, is no more than a start  
with no incentives or duties  
As long as carbon emissions are for free  
no real reductions will be

But we're facing forwards, *forwards* for to find a better *future*  
for the billions to be born  
Forget the past, *forget* what's lost, we'll find the doors to open up  
and greet the grace of dawn
