

Forwards

Happiness was all to short, and the past is lost and gone
and you live with bygone joys .
The dark and cold does poison your mind
and you find no way to rejoice

When your days are a rat race, and life's just a fight
and the loser's always you
It's easy to get stuck with yourself and the past
but life is here and now and what you do

Let's use our heads, let's *go* ahead, go forwards, face the *future* Am Bm
and forget, forget about the past G Bm Em
Some rainy, lousy *Monday* morning, we'll find a door to open, Am Bm Em
and a way ahead at last Am C D*

The Arctic is melting, the sea levels rise
and the wild-fires spread all around
The climate news goes from bad to worse
you can feel the shit going down

The climate agreement, is only make believe
with no obligations or duties
As long as carbon emissions are for free
no real reductions will be

But we're facing forwards, *forwards* for to find a better *future*
for the billions to be born
Forget the past, *forget* what's lost, we'll find the doors to open up
and meet the grace of dawn
