

FridaysForFuture Song

I got every reason on earth to be mad % D G6 %
We're wasting the only earth we ever had % D G6 % A
If I could stop CO₂, G
I'd show you what a little girl can do
But I can't, and I just wanna cry D A D

Droughts and floods, and climate breakdown
Ices melt and island-nations drown
We need to stop this shame
and have our leaders use their brains
'til then, I'll strike from school

I wanna cry out my despair F#m
But crying gets nowhere E
So Friday's I'm on climate strike A
to gather friends to get this right H7 E7 A7

And when they come you better hide the coal far down
where it belongs, way down below the ground
Yes we will stop CO₂
and show you what the little girls can do
And then we'll cry no more

We're gonna bend the chimneys down
right into the ground
and protect the atmosphere
from the greenhouse gas you put up there

And when we come you better hide the gas and oil
Where it belongs far down below the soil
Yes we will stop CO₂
and show you what the little girls can do
And then we'll strike no more
