

We Were Given

We were given the grace, to see with our eyes
a world full of beauty, the wonder of life

We were given the flowers, the birds and the bees
the fields and the forests, the leaves on the trees

Stop the warming, stop the warming, o-oh stop the warming

We were given the earth, the crops and the seed
We were given the farmlands, that yield what we need

We were given the living, in oceans, on land
The future of earth, it's all in our hands

Save our planet, save our planet, o-oh save our planet,

We were given the choice, to care for or waste
to save or destroy. The world's at our grace

Why don't we take action, Why don't we start
to tax the emissions, it's not all that hard

Price the carbon, price the carbon, o-oh price the carbon
Price the carbon, price the carbon, o-oh price the carbon
